

## MISSION STATEMENT:

*To provide community-focused social and recreational activities through exceptional programs, parks and facilities.*

## SEALED BID NOTICE

### Porta Track & Dismount Mat

The Oregon Park District invites sealed bids for the purchase of a 30' Porta Track Tumbling System and 16" Dismount Mat that the District has deemed surplus property.

Sealed bids will be accepted at the Nash Recreation Center until 10:00 a.m. on Friday, May 23, 2025. The bids must be submitted in a sealed envelope with purchaser's name, contact information and bid amount. Bids can be left at the front counter at Nash Recreation Center or mailed to Oregon Park District, attn. Dan Griffin, PO Box 237, Oregon, IL 61061.

The sealed bids will be opened at 10:00 a.m. on Friday, May 23, 2025. The winner will be notified within three days of selection and required to present full payment and complete equipment pickup between May 28<sup>th</sup> – 30<sup>th</sup>. If a winning bidder fails to present payment, the second highest bidder will be given the next opportunity.

The Porta Trak is useful for gyms that put away equipment each night, small gym clubs with space constraints, city recreations, YMCA's, exhibition teams and mobile programs. It's frame is made of aluminum and weighs about half as much as the **Original Tumbl Trak™**, so it can easily be folded and wheeled away.

- Unit features folding hinges and casters for easier transport and storage. The 15-foot and 20-foot units fold in half. The 30-foot unit folds in from both edges down to a total length of 15-feet.
- Recommended for use with Tumbl Trak's™ 6-ft x 12-ft **Dismount Mat** or **Air Platform Mat** with 5-ft x 10-ft x 8-in **Practice Mat** as a landing surface.

Tumbl Trak's™ Dismount Mat, also commonly referred to as a "landing mat" or "crash mat", measures 12-in or 18-in in height, and is the exact size needed to fit safely and securely under any of Tumbl Trak's™ tumbling Trak versions, closing any gap between the Trak and the mat.

- Attaches securely to either end of the **Tumbl Trak™** with heavy duty nylon webbing straps.
- Creates a safe landing zone for skill training.

The equipment is able to be viewed at in the Nash Recreation Center Gymnasium at 304 S. 5th St. Oregon, IL between 2:00 pm – 4:00 pm on the following dates:

May 7<sup>th</sup>

May 14<sup>th</sup>

May 21<sup>st</sup>

Questions about the equipment listed above can be directed to Tina Ketter at [tina@oregonpark.org](mailto:tina@oregonpark.org).
